LINC (Laboratory Instrument Network Controller)

Designed by Noah Husby <opensource@husbylabs.com>

This module acts as a GPIB/HP-IB (General Purpose Interface Bus) controller that reads and sends commands to a PM2812 power supply.The USB-C port on the board allows serial communication with a computer to monitor the power supply. Additionally, an RS485 interface is exposed for a desk-mounted control panel which will display power supply status and allow for control.
